DOMESTIC PRODUCTS MADE IN NORTH AMERICA

Details are the difference between ordinary and EXCELLENCE

DOMESTIC PRODUCTS MADE IN NORTH AMERICA

OPERATION

24 VDC 1500psi pump

Pipeline Pressure Switch (CCS) when satisfied pump will turn on and pump until limit switch is satisfied.

If there is leak down or temperature swings pump will turn back on to maintain ESD open.

If pipeline pressure is outside of set points pump can be started locally and momentarily switch needs to be held until pressure set points are met (safety).

There is a local ESD button on the panel and can be modified to work on any Hydraulic ESD that can take 1500 + psi.

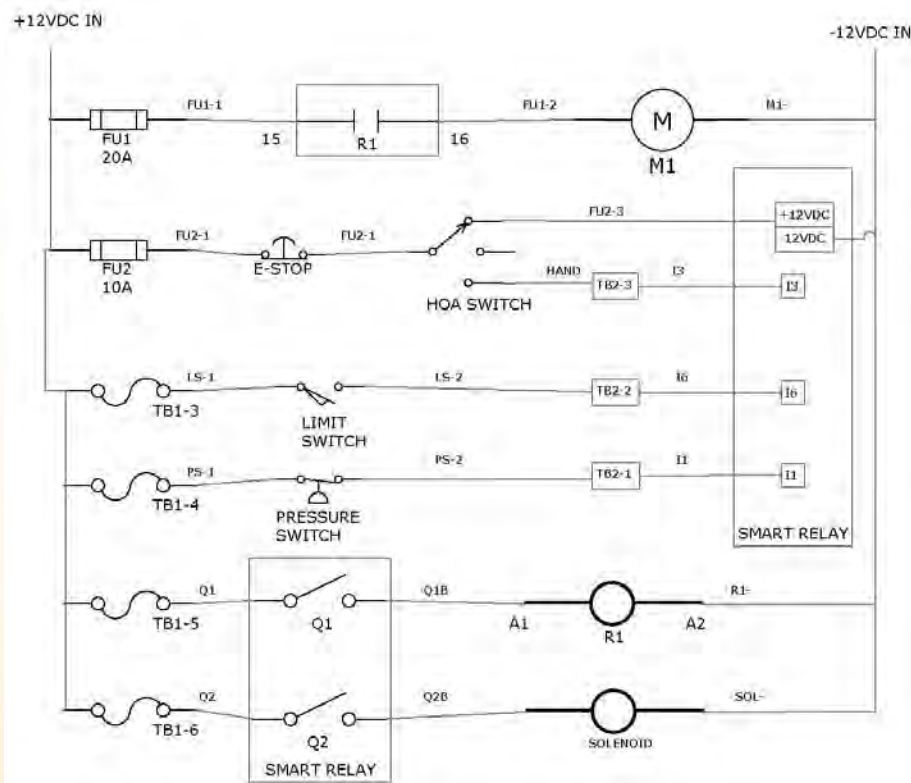

Power loss, line set points and Remote ESD – to shut down.

INSTALLATION

The WCM24VEP is designed for remote sites.

Low 1.4W continuous draw makes the system suitable for solar site applications.

The system is scalable utilizing any of our WCM High Pressure Hydraulic Actuators such as the WCM35 and WCYSF series actuators.

Weir offers technical consulting and provides a total end to end solution.
