DOMESTIC PRODUCTS MADE IN NORTH AMERICA
Details are the difference between ordinary and EXCELLENCE

**Each WCM Hydraulic Actuator
Series Actuator is frozen
and tested for a
MINIMUM of 24 HOURS**

**Solutions for your
company needs**

CUSTOM DESIGN AND MANUFACTURING AVAILABLE

STANDARD Range -50°C to 150°C

FEATURES - Design Construction

- Scotch yoke mechanism for high breakaway and reseal torque, ideal for quarter turn valves.
- Modular with basic drive case/cylinder combinations to suit most economically field requirements.
- O-Ring pistol type for reliable, positive sealing.
- Double acting for spring return styles.
- Stabilized drive rods where required by side loads.
- Safe, reliable, and field removable spring cartridges.
- Tie rod cylinder construction for simplified maintenance.
- SST pressure cylinder for corrosion resistance.

**Weir offers technical consulting and
provides a total end to end solution.**

Material

- Durable, lightweight cast aluminum drive cases are standard, ideal for low temperature.
- Ductile iron yokes or stress relieved cast steel drive cases available.
- Filament wound fibreglass pneumatic cylinders (steel cylinders optional); steel hydraulic cylinders.
- LTN seals are standard; special low temperature or fluoroelastomer seals are also available.
- No brass or bronze components.
- Special trims and coating for corrosive applications.

QUALITY AND PERFORMANCE TESTED

PNEUMATIC OPERATORS

MODEL IDENTIFICATION

Cylinder Size	Series Number	Cylinders	Model Suffixes (Omitted if Not Applicable)			
OO Cylinder Bore Diameter	OO Identifies Series	X Cylinder Arrangement	SR Spring Return Model	OOO Spring Class	Hydraulic	MX Manual Override Options
Omitted here because each cylinder has a unique cylinder bore diameter from 3 1/2" to 7" diameter.	35 50 60 70	"S" for one or "D" for two cylinders pressurized per stroke.	A spring provides for "fail safe" operation. Spring Class identifies particular spring		Hydraulic model	"MJ" - single jackscrew and handwheel "MJJ" - Dual jackscrew and handwheel.
DSRH models are exceptions. They use one single acting hydraulic cylinder opposite the designated spring.

MOUNTING CONTROLS

- Low temperature trim is standard:
-58 to 302F (LT Buna)
- High temperature is optional:
-4 to 392F (H-T Fluoroelastomer/Steel)
-4 to 437F (H-T Fluoroelastmer/Steel)

Extreme low temperature is optional:

-85 to 302F (Fsi/Polyslide)

WEIR HYDRAULIC ACTUATOR SERIES
OPERATES IN TANDUM AS AN
EMERGENCY SHUTDOWN SYSTEM

WITH OUR WCSCHP*

*Weir Self Contained High Pressure Pump

MOUNTING CONTROLS

- Low temperature trim is standard:
-58 to 302F (LT Buna)
- High temperature is optional:
-4 to 392F (H-T Fluoroelastomer/Steel)
-4 to 437F (H-T Fluoroelastomer/Steel)

Extreme low temperature is optional:

-85 to 302F (Fsi/Polyslide)

NOTE: SPRING RETURN OPERATORS

Calculated torques based on efficiency of 80%, as applied to spring force and piston force.

Higher pressures may be available - consult Weir for technical service.
